INFORMATION FURNISHED IN CONFORMITY WITH THE CONVENTION ON REGISTRATION OF OBJECTS LAUNCHED INTO OUTER SPACE

Note verbale dated 3 October 1995 from the Permanent Representative of the Russian Federation to the United Nations (Vienna) addressed to the Secretary-General

The Permanent Representative of the Russian Federation to the United Nations (Vienna) presents his compliments to the Secretary-General of the United Nations and, in accordance with article IV of the Convention on Registration of Objects Launched into Outer Space,* has the honour to transmit information concerning space objects launched by the Russian Federation in June 1995 and concerning objects previously launched by the Russian Federation which ceased to exist in orbit in June 1995.

*General Assembly resolution 3235 (XXIX), annex, of 12 November 1974.

V.95-58288T

ST/SG/SER.E/392

REGISTRATION DATA ON SPACE OBJECTS LAUNCHED BY THE RUSSIAN FEDERATION IN JUNE 1995

1. In June 1995, the Russian Federation launched the following space objects:

No.	Name of space object	Date of launching	Basic orbit characteristics				General purpose of space object
			Apogee (km)	Perigee (km)	Inclination (degrees)	Period (minutes)	
2951	Cosmos-2313 (launched by a Tsiklon-2 carrier rocket from the Baikonur launch site)	8 June	437.7	413	65.1	92.8	The space object is intended for assignments on behalf of the Ministry of Defence of the Russian Federation
2952	Cosmos-2314 (launched by a Soyuz carrier rocket from the Plesetsk launch site)	28 June	368	177	67	89.6	The space object is intended for assignments on behalf of the Ministry of Defence of the Russian Federation

2. The following space objects ceased to exist in June 1995 and were no longer in earth orbit at 2400 hours Moscow time on 30 June 1995:

1993-044A (Cosmos-2258)
1984-029A (Molniya-1)
1983-073A (Molniya-1).

ANNEX

REGISTRATION DATA FOR U.S. SPACE LAUNCHES*

The following report supplements the registration data for the United States Launches as of 31 March, 1995.
All launches were made from the territory of the United States unless otherwise specified.

International Designation	Date of Launch	Basic Orbital Characteristics				General Function of Space Objects
		Nodal Period (min)	Inclination (degrees)	Apogee (km)	Perigee (km)	
The following objects were launched since the last report and remain in orbit:						
1995-013B	22 March 1995	709.9	26.5	39,789	177	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1995-015A	24 March 1995	101.9	98.9	853	839	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-015B	24 March 1995	101.9	98.8	858	858	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1995-015C	24 March 1995	101.9	98.8	857	851	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
The following objects not previously reported have been identified since the last report:						
1994-017K	13 March 1995	96.2	105.0	603	592	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
The following objects not previously reported have been identified since the last report but are no longer in orbit as of 2400Z 31 March, 1995:						
NONE						

*The registration data are reproduced in the form in which they were received.

International Designation	Date of Launch	Basic Orbital Characteristics				General Function of Space Objects
		Nodal Period (min)	Inclination (degrees)	Apogee (km)	Perigee (km)	
The following objects achieved orbit since the last report but are no longer in orbit as of 2400Z 31 March, 1995:						
1995-007A	02 March 1995	91.6	28.4	373	333	Reusable space transportation systems
The following objects identified in a previous report are no longer in orbit as of 2400Z 31 March, 1995:						
1994-006F						
1994-028B						
1995-004F						
The following objects were launched since the last report but did not achieve orbit:						
NONE						
Revisions that should be made to previously reported data:						
NONE						

REGISTRATION DATA FOR U.S. SPACE LAUNCHES

The following report supplements the registration data for the United States Launches as of 30 April, 1995.
All launches were made from the territory of the United States unless otherwise specified.

International Designation	Date of Launch	Basic Orbital Characteristics				General Function of Space Objects
		Nodal Period (min)	Inclination (degrees)	Apogee (km)	Perigee (km)	
The following objects were launched since the last report and remain in orbit:						
1995-017A	03 April 1995	99.6	70.0	755	726	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-017B	03 April 1995	99.6	69.9	746	732	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-017C	03 April 1995	99.6	69.9	748	729	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-017D	03 April 1995	99.6	69.9	748	735	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1995-019A	07 April 1995	715.0	26.6	40,042.3	177.6	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-019B	07 April 1995	717.6	25.5	40,203.7	143.2	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
The following objects not previously reported have been identified since the last report:						
1994-017L	13 March 1994	96.2	105.0	602	593	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1967-048E	18 May 1967	106.6	89.5	1,096.0	1,049.3	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
The following objects not previously reported have been identified since the last report but are no longer in orbit as of 2400Z 30 April, 1995:						
NONE						

International Designation	Date of Launch	Basic Orbital Characteristics				General Function of Space Objects
		Nodal Period (min)	Inclination (degrees)	Apogee (km)	Perigee (km)	
The following objects achieved orbit since the last report but are no longer in orbit as of 2400Z 30 April, 1995:						
NONE						
The following objects identified in a previous report are no longer in orbit as of 2400Z 30 April, 1995:						
1977-065DN						
The following objects were launched since the last report but did not achieve orbit:						
NONE						
Revisions that should be made to previously reported data:						
NONE						

REGISTRATION DATA FOR U.S. SPACE LAUNCHES

The following report supplements the registration data for the United States Launches as of 31 May, 1995.
All launches were made from the territory of the United States unless otherwise specified.

International Designation	Date of Launch	Basic Orbital Characteristics				General Function of Space Objects
		Nodal Period (min)	Inclination (degrees)	Apogee (km)	Perigee (km)	
The following objects were launched since the last report and remain in orbit:						
1995-022A	14 May 1995	90.7	28.6	455	165	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-022B	14 May 1995	90.7	28.6	455	165	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1995-025A	23 May 1995	1,604.2	0.2	42,419	35,614	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-025B	23 May 1995	744.3	27.0	41,520	135	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1995-027A	31 May 1995	1,436.4	5.1	36,522	35,062	Spacecraft engaged in practical applications and uses of space technology such as weather or communications
1995-027B	31 May 1995	460.0	26.9	26,441	279	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
The following objects not previously reported have been identified since the last report:						
1994-017M	13 March 1994	94.5	105.1	537	490	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1994-017N	13 March 1994	96.3	105.0	628	577	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1994-017P	13 March 1994	96.4	105.0	641	563	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects
1990-068D	2 August 1990	718.0	54.8	20,505	19,861	Spent boosters, spent manoeuvring stages, shrouds and other non-functional objects

International Designation	Date of Launch	Basic Orbital Characteristics				General Function of Space Objects
		Nodal Period (min)	Inclination (degrees)	Apogee (km)	Perigee (km)	
The following objects not previously reported have been identified since the last report but are no longer in orbit as of 2400Z 31 May, 1995:						
NONE						
The following objects achieved orbit since the last report but are no longer in orbit as of 2400Z 31 May, 1995:						
NONE						
The following objects identified in a previous report are no longer in orbit as of 2400Z 31 May 1995:

SER.E/294

REGISTRATION DATA ON SPACE OBJECTS LAUNCHED BY THE RUSSIAN FEDERATION IN JULY 1995

1. In July 1995, the Russian Federation launched the following space objects:

No.	Name of space object	Date of launching	Basic orbit characteristics				General purpose of space object
			Apogee (km)	Perigee (km)	Inclination (degrees)	Period (minutes)	
2953	Cosmos-2315 (launched by a Cosmos carrier rocket from the Plesetsk launch site)	5 July	1,027	988	82.9	105	Traffic control of ships at sea, determination of their position, transmission of various forms of operational information
2954	Progress M-28 (launched by a Soyuz carrier rocket from the Baikonur launch site)	20 July	258	191	51.6	88.7	Delivery to the Mir manned orbital station of consumables and various cargoes
2955	Cosmos-2316* (launched by a Proton carrier rocket from the Baikonur launch site)	24 July	19,120		64.4	11 h 15 min	Operation as part of the GLONASS space navigation system
2956	Cosmos-2317*	24 July	19,120		64.4	11 h 15 min	"
2957	Cosmos-2318*	24 July	19,120		64.4	11 h 15 min	"

**Note*: The space objects "Cosmos-2316", "Cosmos-2317" and "Cosmos-2318" were launched by a single Proton carrier rocket from the Baikonur launch site.

2. At 2400 hours Moscow time on 31 July 1995 there were no space objects that had ceased their existence in Earth orbit in July 1995.

V.95-60284T

REGISTRATION DATA ON SPACE OBJECTS LAUNCHED BY THE RUSSIAN FEDERATION IN AUGUST 1995

1. In August 1995, the Russian Federation launched the following space objects:

No.	Name of space object	Date of launching	Basic orbit characteristics				General purpose of space object
			Apogee (km)	Perigee (km)	Inclination (degrees)	Period	
2958	PROGNOZ-M2 (launched by a Molniya carrier rocket from the Plesetsk launch site)	3 August	192 000	776	63	91 h	Conduct of long-term basic studies on processes in the geomagnetic tail of the Earth's magnetosphere under the "Interball" international project
2959	MOLNIYA-3 (launched by a Molniya carrier rocket from the Plesetsk launch site)	9 August	40 851	472	62.8	13 h 17 min	Operation of the long-range telephone and telegraph radio-communications system and transmission of television programmes to points on the Orbita network and international cooperation
2960	COSMOS-2319 (launched by a Proton carrier rocket from the Baikonur launch site)	30 August	35 742		1.6	23 h 59 min	Space object intended for carrying out assignments in the interests of the Ministry of Defence of the Russian Federation

2. The following space object ceased to exist in August 1995 and was no longer in Earth orbit at 2400 h Moscow time on 31 August 1995: 1993-060A (Cosmos-2264).

3. The Czech subsatellite Magion-4 was separated from the space object Prognoz-M2 during the latter's first orbit, and is intended for conducting coordinated space-time measurements.

Annex

REGISTRATION DATA FOR REPUBLIC OF KOREA SPACE OBJECTS*

Name of space object:	KITSAT-1	
Date of launch:	11 August 1992	
Basic orbital parameters:	Nodal Period:	112.0 minutes
	Inclination:	66.1 degrees
	Apogee:	1,318.3 kilometres
	Perigee:	1,314.2 kilometres

General function of space object:

Satellite engaged in experimental applications of space technology such as:

Earth imaging;
Packet communication;
Cosmic particles measurement; and
Digital signal processing.

Name of space object:	KITSAT-2	
Date of launch:	26 September 1993	
Basic orbital parameters:	Nodal Period:	100.8 minutes
	Inclination:	98.6 degrees
	Apogee:	805.7 kilometres
	Perigee:	790.4 kilometres

General function of space object:

Satellite engaged in experimental applications of space technology such as:

Earth imaging;
Packet communication;
Low energy particles measurement;
Digital signal processing; and
32-bit onboard computer.

---

*The registration data are reproduced in the form in which they were received.
